Product Designer

Creative Product Designer with 3 years of experience in SaaS and B2C product development, dedicated to developing user-centric solutions and proficient in contemporary web technologies. Eager to leverage my design and technical skills across various industries, including edtech, legalTech, and community projects, demonstrating versatility and a readiness to embrace diverse challenges.

WORK EXPERIENCE

UniCourt

Product Designer/UI-UX Engineer

04/2022 – Present

Mangalore, Karnataka, India

- Designed and shipped end-to-end enterprise products and internal tools for Support, QA, and Operations teams, simplifying complex legal data workflows.
- Co-designed major enterprise products while collaborating closely with Product, Engineering, and Design teams.
- Built and maintained a scalable design system across multiple products, including reusable components, design tokens, documentation, and Figma libraries.
- Created an AI-native, agentic design system architecture that enables designs to be generated, published, and directly injected into the codebase, reducing design handoff time to near zero and accelerating development.
- Leveraged Cursor, AI workflows, and MCP concepts to establish accurate design-to-code processes, improving implementation speed and consistency.
- Conducted extensive POCs to evaluate UX patterns, frontend frameworks, and component libraries, helping drive product and technical decisions.
- Led UI performance optimization initiatives using Lighthouse audits and collaborated with developers to improve overall product quality.
- Designed intuitive user flows and information-rich interfaces through usability testing, research, and iterative design improvements.
- Translated designs into Angular, Tailwind CSS, HTML, and CSS, enabling faster collaboration with engineering teams and high-fidelity implementation.
- Introduced AI-assisted prototyping and A/B testing workflows that reduced design and implementation timelines from months to weeks.
- Conducted workshops, created custom tools and extensions, and improved design review processes, increasing team productivity by 30%.
- Worked in Agile product teams with strong ownership, balancing user needs, business goals, and technical constraints to deliver impactful product experiences.
- Designed backend system solutions for web applications, elevating efficiency and user satisfaction via optimized account management. Co-designed B2C web and mobile applications, ensuring cross-platform consistency with a cohesive design system.
- Leveraged Angular and Tailwind CSS to translate complex designs into functional HTML and CSS. Collaborated with management and development teams, aligning design strategies with product goals, leading to significant product improvements.

HaiLABs

Product Designer

11/2021 – 11/2022

London

- Directed the redesign of a web application into a gamified platform for educating children on data science, AI, and machine learning, significantly enhancing user engagement through improved aesthetics and interactive learning experiences.

- Developed and executed key UX strategies that were critical to the MVP's successful launch, showcasing an ability to balance design innovation with practical implementation.
- Awarded a prestigious STEM certificate from Stanford University for exceptional contributions to educational technology, recognizing the impact of design on learning outcomes.

EDUCATION

M.S Geoinformatics in (Map Design) in Geoinformatics (Map Design)

Mangalore University

10/2021

B.S. Geology

Christ College

01/2018

SKILLS

A/ B Testing, AI Design System, AI Prototyping, AI Workflows, Angular, Css3, Cursor, Cursor- AI, Enterprise Software, Enterprise Ui design, Figma, Frontend, HTML5, Human- centered experiences, low- fi/ high- fi prototypes, Mockups, Product Design, Responsive Design, site- map, Tailwind, (UCD) Principles, User Research
